DESCRIPTION:

The Patented GripClip™ 625 is made of 1.2mm thick 5052 black anodized aluminum and is designed to withstand 40lbs of pull force. The 625 Model refers to the 'mouth height' of the clip, which is 5/8" (.625"), or 16 mm. The 625 is best suited for roof materials that are 3/8" to 5/8" thick. Common examples are cedar shingles, tapered shingles, Davinci synthetic slate and Brava synthetic shakes. It may also work on super thick designer asphalt shingles, that are triple and quadruple laminated. The 625 comes in 25 packs. The GripClip™ 625 can be installed and removed without the use of tools.
